

IT CONSULTANT

Faccio a e b

Java Developer

I'm able to build high-performing, scalable, enterprise-grade applications. Java developer roles and responsibilities include managing Java/Java EE application development while providing expertise in the full software development lifecycle, from concept and design to testing.

Javascript

A JavaScript developer is responsible for implementing the front-end logic that defines the behavior of the visual elements of a web application. A JavaScript developer is also responsible for connecting this with the services that reside on the back-end. They are usually supported by back-end web developers, who are responsible for server-side application logic. JavaScript developers often work alongside other front-end web developers who specialize in markup and styling.

C#

C# is a modern, general purpose, object-oriented programming language designed around the Common Language Infrastructure. A great C# developer is capable of handling many aspects of developing an application, including but

not limited to performance, scalability, security, testing, and more. C# developers can develop modern applications that run on desktop computers, or even sophisticated back-end processes powering modern web applications. The frameworks .Net and Mono combined allow a wide range of platforms to be targeted by applications developed with C#.

Business Intelligence

Is your existing environment a combination of tools utilising Excel, Access, Oracle and other automated processes? So here I am! Over time these processes might be redeveloped, so depending upon your needs we may be involved software development and database design. We will have the opportunity to gain new skills as the systems evolve through on-the-job and formal training programmes.

IT Department

I'm not a nerd at all. I am for the role of IT manager to be responsible and accountable for the smooth running of our computer systems within the limits of requirements, specifications, costs and timelines supervising the implementation and maintenance of yours company's computing needs.

Other skills

Tecnico commerciale, software deliverly, tesoreria, amministrazione, finanza e controllo di gestione. I'm involed in a bunch of projects related to pure mathematics. Main topic includes math knowldge managment.
